

Whole Coriander Seeds — Product of Danish Agro Farms

Premium Quality | Bulk Supply | Customised Packaging

Product Overview

Danish Agro Farms offers quality Whole Coriander Seeds, carefully sourced to meet the requirements of spice processors, food manufacturers, wholesalers, distributors, restaurants, and commercial kitchens.

Whole coriander seeds are widely valued for their warm, citrus-like aroma, mildly sweet flavour, and versatile culinary applications. They are an essential ingredient in traditional spice blends, curry powders, pickles, marinades, and a wide range of food products.

We procure coriander seeds in bulk and can arrange cleaning, sorting, grading, and customised packaging according to customer requirements, agreed specifications, and processing availability.

Key Features

- **Quality-Focused Sourcing:** Coriander seeds selected according to agreed quality requirements.
- **Characteristic Aroma:** Warm, fresh, citrus-like fragrance.
- **Distinctive Flavour:** Mildly sweet, earthy, and aromatic flavour profile.
- **Whole Seed Format:** Suitable for direct use, roasting, grinding, and spice blending.
- **Bulk Procurement:** Supply options for commercial and industrial buyers.
- **Customised Preparation:** Cleaning, sorting, and grading options according to agreed requirements.
- **Flexible Packaging:** Bulk and customised packaging options for different business needs.

Sourcing & Procurement

Danish Agro Farms sources whole coriander seeds from selected suppliers, with sourcing options based on seasonal availability, origin, quality, and customer specifications.

For buyers requiring a particular country of origin or defined product grade, sourcing details and relevant lot documentation can be discussed before order confirmation.

Our aim is to support customers with suitable raw materials for spice manufacturing, food processing, wholesale distribution, and retail packing.

Product Specifications

Quality Parameters According to agreed specifications and applicable requirements

Final specifications, including moisture, foreign matter, purity, seed size, and microbiological criteria, can be agreed according to customer requirements.

Processing & Customisation

Depending on the agreed supply arrangement and processing capability, preparation options may include:

- Raw material inspection and selection
- Cleaning to remove unwanted foreign matter
- Sorting and grading according to agreed requirements
- Assessment of appearance, aroma, and physical quality
- Bulk preparation for spice processors and food manufacturers
- Customised packing and labelling, subject to agreement

Applications

Whole Coriander Seeds are widely used in:

- Curry powders and traditional spice blends
- Garam Masala and other seasoning formulations
- Pickles, chutneys, and marinades
- Meat, poultry, and vegetable preparations
- Soups, sauces, and savoury products
- Roasted spice formulations
- Grinding and processing into coriander powder
- Restaurants, hotels, catering, and commercial kitchens
- Food manufacturing and spice processing industries

Bulk Supply & Customised Packaging

Danish Agro Farms provides sourcing and supply solutions for businesses requiring whole coriander seeds in commercial quantities.

Packaging options and order quantities can be discussed according to customer requirements and order feasibility. Customers may specify their preferred packaging size, product grade, cleaning requirements, and labelling needs.

Why Choose Danish Agro Farms?

- Bulk sourcing and procurement support
- Product preparation according to agreed specifications
- Cleaning, sorting, and grading options
- Customised packaging arrangements
- Supply solutions for spice processors, wholesalers, and food manufacturers
- Customer-focused service and quality coordination

Our Commitment

At Danish Agro Farms, we aim to supply quality agricultural products and food ingredients that meet agreed customer specifications. From sourcing and product preparation to packaging coordination, we work to support the requirements of our business customers.
