FOOD ADDITIVES

Quality-Focused Sourcing | Customer-Specific Specifications | Technical Compliance | Bulk Supply

Product Overview

Danish Agro Farms provides food additives sourced according to customer requirements, product formulations, technical specifications, and intended applications. We support food manufacturers, processing industries, bakeries, beverage producers, sauce and condiment manufacturers, and other food businesses by helping them source suitable food additives from appropriate suppliers.

Our focus is on understanding customer needs, identifying suitable products, verifying available technical documentation, and coordinating supply according to agreed specifications and applicable food regulations.

Our Food Additives Range

Subject to availability, intended use, and applicable regulations, our sourcing range may include:

- Preservatives: Additives used to help control spoilage and extend product shelf life where permitted.
- Food Acids & Acidity Regulators: Citric acid, acetic acid, and other suitable aciditycontrol ingredients.
- Thickeners & Stabilizers: Ingredients used to achieve the required texture, consistency, and stability.
- Emulsifiers: Ingredients that help maintain uniform mixtures of oil and water.
- Antioxidants: Ingredients used to help reduce oxidation in suitable food applications.
- Colours: Approved food colours according to customer specifications and regulatory requirements.
- Flavour Enhancers: Ingredients used to enhance the desired taste profile.
- Sweeteners: Approved sweetening ingredients for suitable formulations.
- Anti-Caking Agents: Ingredients used to improve the flow of powdered products where appropriate.
- Raising Agents: Ingredients used in bakery and other suitable applications.

Key Features

- Sourcing according to customer requirements and technical specifications.
- Options for food-grade ingredients from suitable suppliers.
- Support for product selection based on intended application.
- Supplier documentation and Certificates of Analysis (COAs), where available.

- Bulk quantities and customised packaging options, subject to availability.
- Attention to quality, traceability, and regulatory compliance.
